Did you know that you could save thousands of dollars a year by carpooling? Carpooling helps to keep costs low and reduces the amount of carbon released into the atmosphere and our dependence on foreign oil. For example, imagine that two people ride together, and that resulted in a savings of 15 gallons of gas per week. Multiply that over one year and the savings is 780 gallons. Let's say that the cost of gas averaged \$4.00 per gallon over the year. That's a savings of \$3,120 per year!
